<p>ISO 9001:2015 ISO 14001:2015 ISO 45001:2018</p>		<p>Doc Ref: EP 01</p>

TTI Testing Limited is a private limited UK company, based in Wallingford, Oxfordshire. TTI Testing is one of the leading companies in the field of inspection, testing services and forensic analysis for wire and fibre ropes, chain, electromechanical cables and related interface components in the onshore and offshore markets, and we have a strong commitment to excellence in all areas. Through our adoption of ISO 14001 and our environmental policy we wish to communicate our commitment to the protection of the environment, endeavouring to limit adverse effects in the environment in which it operates, ensuring that it meets all relevant compliance obligations and its operations are acceptable internationally. We are aware of the impact of climate change and the importance of making our operations as sustainable as possible so we can do our bit to mitigate this issue.

TTI Testing Limited's Management Team and employees are committed to running the business in such a way that will, as far as possible, prevent pollution and support environmental protection. This will be achieved by being aware of and implementing as far as possible the use of sustainable resources, to mitigate its effect on climate change as far as is practicable and to protect biodiversity and by the elimination or minimisation of waste and pollution, with due regard to all legislation, consents & controls. The Management Team recognises that its EMS is embodied within its documentation and can only form a base on which more comprehensive environmental aims can be built. TTI Testing Limited will set specific Environmental Objectives & Targets relating to the company's environmental goals & its EMS. These Objectives & Targets are reviewed using TTI Testing Limited's Internal Audit and Management Review processes. We have already implanted a substantial programme to generate electricity from solar power to reduce the amount of power we consume as a business.

TTI Testing Limited's Management Team identifies, reviews, evaluates and implements such legislation, as well as relevant statutory regulations and professional requirements that impact upon its business operations and considers all relevant environmental issues when making decisions impacting on their work. All employees are made aware of our responsibilities for and commitment to acting in accordance with our Environmental Policy, whilst working to continually improve its Environmental Management System (EMS). The Management Team intends that this EMS forms a part of its overall Integrated Management System (IMS) encompassing, not just Environmental but also Quality & Health and Safety issues, and recognises that, whilst each subject requires distinct treatment, the majority of aspects are inextricably linked.

TTI Testing Limited's Environmental Aspects are determined, evaluated and their level of significance identified against them. From these we set specific Environmental Objectives & Targets in order to reduce these significant environmental impacts. We are also committed to minimising any disturbance to the local environment and the community in which we operate, including the presentation of our own premises.

The scope of our EMS is the inspection, testing services and forensic analysis for wire and fibre ropes, chain, electromechanical cables and related interface components in the onshore and offshore markets carried out at our premises at Unit 2, Hithercroft Road, Wallingford. In determining the Scope of our EMS we have considered our compliance obligations, the needs and expectations of our interested parties and the context of our organisation.

This policy is communicated to all staff, its suppliers, sub-contractors and any other interested parties (i.e. Clients, stakeholders etc.), as well as to the public on request. We want our goals in respect of the environment to be shared as far as possible, and for everyone who deals with us to be aware of them.

Chris Berryman  
Managing Director

Date 3<sup>rd</sup> December 2024

(This policy is reviewed annually at the Quality Management Review meeting)
