

 TTI Testing	<h2>GENERAL HEALTH AND SAFETY POLICY</h2>	INTERNAL
ISO 9001:2015 ISO 14001:2015 ISO 45001:2018		Doc Ref: QP 01

TTI Testing Limited is a private limited UK company based in Wallingford, Oxfordshire. TTI Testing is one of the leading companies in the field of inspection, testing services and forensic analysis for wire and fibre ropes, chain, electromechanical cables, and related interface components, and we have a strong commitment to excellence in all areas.

As part of our commitment to health and safety and as part of our integrated management system we have implemented a Health and Safety Management System (HMS) in compliance with the requirements of ISO 45001:2018. The scope of our HMS is “provision of inspection, testing services and forensic analysis for slender elements, wire and fibre ropes, chain, electromechanical cables and related interface components in the onshore and offshore markets” carried out at our premises at Unit 2, Hithercroft Road, Wallingford.

The company and I are committed to providing safe and healthy working conditions for the prevention of work-related injury and ill health to our people, customers and the public. The arrangements section of this policy looks at the specific OH&S risks and OH&S opportunities related to provision of our services.

To achieve this, we are fully committed to comply with the legal requirements of The Health and Safety at Work etc Act 1974 and any other requirements that are related to our line of work. The HMS provides a framework for setting and monitoring our health and safety objectives while continually improving the effectiveness of our HMS. These objectives, which are set at management review meetings, are devised to enable us to address areas where improvement is possible. At these meetings we also ensure that this policy, the HMS and the health and safety objectives remain compatible with the strategic direction, the purpose and the context of our organisation. We also commit to continually improve our HMS by reviewing it regularly and monitoring its effectiveness. This will enable us to improve our operations so that we continue to meet the requirements of our customers, as well as our legal, regulatory and any other applicable requirements.

The H&S Policy, Objectives and the requirements of the H&S Management System are communicated to all our staff within the organisation. This is achieved via induction and training programmes. Management Review minutes are also communicated to all relevant staff. While we endeavour to consistently meet and exceed safety expectations we understand that accidents do happen. We review these incidents to ensure these hazards and risks are reduced from learnings gained.

As Managing Director, I am responsible for monitoring the HMS and reporting regularly to the Senior Management team on the system's implementation, status, and effectiveness. We are committed to regularly consult with our workers and have them participate in the introduction of new policies and procedures.

Chris Berryman
